# Welcome

## TO OUR 21<sup>ST</sup> ANNUAL BULL SALE

Thank you for taking the time to look through our catalog and consider a High Bluff animal for your operation. We're in some exciting times as beef producers! The strength of the cattle market, marked by sustained demand and strong prices, provides a solid foundation for growth and exciting times ahead. We find great fulfillment in being a part of the beef industry. Being a multigenerational family business and having our own little one Lainey who seems to love cattle just as much as we do, adds an extra layer of significance to our work. It's not just about transactions; it's about carrying forward our families farming operations and a shared passion for the beef industry. As you all know in the beef business, it's not just about the product; it's about the people, the relationships, and the shared love for this remarkable industry.

This year Stephen, myself and his parents Brenda and Herb of Johnson Charolais were honored to be chosen by our fellow cattle producers as the winner of the Players Club \$50,000 bull jackpot. As we reflect on this exciting achievement, we extend our gratitude to our fellow breeders for voting for Limitless and to the Manitoba Charolais Association for organizing and BoviGen for sponsoring. We can't wait to be a part of this great event again this fall. It was also so exciting to take home the Reserve Grand Champion Charolais bull at the National Charolais Show with High Bluff Lucky Strike 43L, LOT 12 and represent the Charolais bulls out in the President's Classic with HRJ Landslide 310L, LOT 1, who also brought home an Agribition banner. It really was a special year on the show front!

Flipping through the catalog this year you will find HRJ tattoos which is the Johnson family tattoo. Stephen and I like a lot of the same things and luckily cattle type is one of them! You will find so much consistency between our two herds, the HRJ cattle that are in the sale were born at the farm in Inglis and will fall under the same breeder guarantee and support as the HBSF tattooed bulls. You will also see PAX Angus bulls in the sale from Tyler Digby, while Tyler is new to the purebred business don't let this fool you, there are deep genetics in those bulls, and were we ever impressed when we toured his bulls and replacement females this winter!

Whether you are on the search for a foundation female, a junior show prospect or to build your herd capacity we encourage you to walk through the heifer pen and find what you are looking for. Our heifer pen stands as a testament to our focus on practical breeding principles, prioritizing functionality, balance, maternal attributes, and efficient movement.

Stepping into the bull pen is a lot of fun because we are seeing years of work on consistency really shine through - they are such a uniform bunch across both breeds! The bulls exhibit a noteworthy combination of hair, depth, thickness, functional conformation, with a focused emphasis on disposition. Consistency is key in our breeding program, and come weaning time we expect all our bulls to be heavy hitters, ensuring that each bull will be a reliable contributor to the overall quality and success of your herd. Be sure to let us know what you are looking for and we'd be happy to help you select your next herd sire or female.

The tradition continues,

*Erin*

# High Bluff

## STOCK FARM

**DONNA AND CARMAN** started High Bluff Stock Farm in 1984. They have worked hard to grow their Charolais and Simmental purebred herd and grain production to what it is today. Carman and Donna are excited to be able to farm alongside their family.

**ERIN AND STEPHEN** Erin and Stephen are both farming full time at High Bluff Stock Farm. Their daughter Lainey seems to love farming as much as they do.

**TOMINA JACKSON** Tomina is an integral part of all the day-to-day activities in the grain and livestock operations. She specializes in being our barn mom and chief combine driver and mechanic. She spends Wednesdays and her weekends working on her Rolling D Workwear line.

**FAWN JACKSON** Fawn heads up the High Bluff PR department. She manages our social media accounts, helps with bull sale preparation and makes sure we are getting a show string ready to take out in the fall so she can spend her holidays doing what she loves the most- showing cattle!

**ANG BECKER** Ang joined the High Bluff team a couple years ago during calving season. Turns out the Aussie who started not liking being outside during winter has had a change of heart and now happily tolerates working outside all winter as long as it includes working with baby calves.

**JULES SMYTH** Jules has been helping casually on the farm for around 8 years. She's now away at University at Oklahoma but we are lucky that she still likes to spend her summers at home and working at High Bluff during her time off. Jules is a jack of all trades when it comes to our cattle operations and yard duties.

**DEL BARBER** Del helps out around the farm when he has some down time. He's an integral part of our harvest crew and helps out with feeding or fixing when he can.

**ELLA MARZOFF** Ella joined our team this winter. A couple days a week helping with calving chores.

**THE JACKSONS, Inglis, Manitoba**  
 Carman and Donna: 204-773-6448 Erin and Stephen: 204-821-4110 / 780-305-9196

**PERFORMANCE** Birth weights, 205 day weights, 365 day weights and EPDs are provided wherever possible. Current weights will be available sale day.

**BREEDING GUARANTEE** The bulls are fully guaranteed to be a breeding bull as outlined by the Charolais and Simmental Breeder's Guarantee Guidelines. Semen tests will be done when recommended by our veterinarian. High Bluff Stock Farm reserves the right to be the first to know about any problems you might have with your bull. Should any bull fifteen months of age or over fail to prove a breeder after being used on females known to be breeders, the matter shall be reported in writing to the seller immediately when the problem is detected. The matter shall be reported in writing to the seller, enclosing a report prepared by a licensed veterinarian, within six months following the date of purchase or date of first exposure, or six months after the bull has reached 15 months of age. Any bull that does not prove to be a satisfactory breeder will be returned to High Bluff Stock Farm at the buyers expense. The seller will have the right and privilege of six months to prove the bull a breeder. Should the bull prove to be a breeder, he will be returned to the buyer, and the matter will be considered closed. If the bull fails his semen test or proves not to be a breeder we will replace your bull with another bull of equal quality or lend you a bull to make sure your cows get bred or give you a sales credit. No guarantee is given that semen collected from the bull will freeze.

**BULL PREPARATION** We are committed to raising cattle the best we can in the environment we have. Animal health, temperament, fitness and longevity are important to us and key to our own and our customers success. The bulls are developed on a TMR ration of silage, chopped hay, rolled barley, corn, minerals and vitamins as well as free choice hay. We work with a nutritionist to make sure all of our cattle's dietary needs are met. We have a complete herd health and vaccination program with Roblin Vet Clinic. Prior to the sale bulls will be measured and inspected by one of the vets at Roblin Vet Clinic. All bulls have been treated with Ivermectin once, Clean Up once, and fusinguard once and have been pre-breeding vaccinated with Bovi Shield Gold One Shot this winter. Heifers have been treated with Ivermectin once, Clean Up once, and have been pre-breeding vaccinated with Bovi Shield Gold One Shot this winter.

**TERMS & CONDITIONS** The sale will be conducted under the standard Transcon Livestock Corp Terms & Conditions. Copies will be available at the settlement desk.

**PHOTOS & VIDEOS** Pictures taken by High Bluff Stock Farm Crew Videos taken by John Wright - Wright Livestock Marketing Services Videos can be found at cattlevids.ca

**RIGHT TO SEMEN** We reserve the right to draw semen on any bull in the sale for in herd use, at our expense and the buyer's convenience.

**DELIVERY** Free delivery to your farm free of charge up to 200 km. Other destinations can be arranged at cost. We will Deliver bulls from March 16 to May 1st at our convenience. If you are unable to take your bull when we are going by you can pick up your bull when it works for you. Board free until May 1st or until we are able to deliver your bull- whichever comes first. \$5/day after that. All animals left at the farm after the sale must be insured. The High Bluff team will provide the best care we can to the animals that stay on the farm but all bulls and females become the risk of the buyer once sold.

## WELCOME FROM TRANSCON LIVESTOCK

This multi-generational mixed farming operation has a widely respected reputation for their pride of being agricultural ambassadors and also more officially known as "Agvocates", volunteering their time to conventions and hosting domestic and foreign tours as educational opportunities relative to the industry. They enjoy and feel an obligation to their livelihood to do so, taking time aside from raising pedigreed seed and raising registered cattle.

Their reputation as quality seedstock people is pronounced. This year's Charolais bulls have a great feature in lot 1, an "Innovation" son, making him a paternal brother and stall mate to the recent Player's Club Champion. He comes highly decorated himself by his own accomplishments as a member of the HBSF/Johnson display team.

"Ballyhoo" is an impressive specimen of a herd sire to see and he has transmitted his great length, wide toplines and big hips to his sons. These are bulls that will truly bring that payweight home for you. "Mescalito" sons are available again, and I'm sure will be popular just as they have been in the past, with their complete phenotype and "good look"! It's great to have a good draft of "Three Thieves" sons again. This bull stamps them to a tee and they are truly the right kind for the industry with their big, deep, square hips, masculine profiles and poundmaker tendencies. These will sell early in the day, particularly a member of the aforementioned display team, he's serious herd bull opportunity! "JJ" has the most sons on that same display team that was campaigned last fall. He is a former sale feature and is owned with the reputable MJT program from Edgerton, AB. You'll like the haircoats on these guys, typical of the HBSF program. For those of you that enjoy "bucks skin" calves topping the market, male or female, and how that color translates to "green", there's some "horsepower" coming from the big ole soft sided "Chisholm" son cataloged, he's got that great herd bull presence about him, not to mention he's got the "tools" to measure up! And let's throw in a maternal brother to the incredibly, nearly perfectly made, "Casanova", a former past high-seller to Soderghen Ranches, plus a direct son of this stud.

Simmental time! These guys really grabbed the public's attention last year, and even claimed the high seller title on the day. "Driller" @ 10 years old still played his role this past breeding season and his top son leads the Simmi section of the catalog. The quality of these cattle is well known and he being a maternal brother to one of the best Red Simmental bulls there ever was, KOP Crosby, tells you they have the solid dynamics of the cow family behind him. And just like his famous brother, the progeny are so very quiet, quite the economic trait! And, in essence, an outcross bonus to boot!

"Epic" also once again represents a sire a group. These cattle, even tho widely used as an A.I. sire, is still a different strain from most of the "pigeon-holed" science driven pedigrees. The "Epic" cattle possess a wide spread from birth to weaning to yearling on a real life weigh scale. They've been impressive and standouts exist in this fraternity. We've sure enjoyed a mild winter this year, but definitely not the norm, and cattle that have those thick, thick haircoats are the "Playmaker" sons. They can handle the prairie winters plus the added performance and growth. A "Playmaker" son was the high selling Red SM Bull last year and the heavyweight of the sale, both breeds included. Also in the Simmental section are the "Walk the Line" sons. Expectations were certainly high after this bull sold for a huge price tag, but he's bred as hoped, and in multiple herds. They have a "good look" to them that I think you'll appreciate.

The sale certainly has an opportunity to offer "one stop shopping", not trying to over use the phrase, but a really nice set of Black Angus bulls are offered by Donna's cousin at Paxhill Farms, that have notable sire codes respective to their breed, with calving-ease oriented to performance AN are all included, take your pick and add to your cross breeding program.

Well it took some arm-twisting, not sure exactly to whom, but we finally got the Jacksons to add some heifers to the sale a few years ago. '24 will see another group of gals, from both breeds, and nicely set in as sisters to the bulls that sell. They also represent the cow families of HBSF! Pretty nice base to build off of if you're new to the business or for those of you wanting to acquire a piece of this excellent cowherd.

We hope you can attend the sale, but understand it doesn't always work in your busy schedules, so please feel free to call any of our cell phones to access our highly-trusted, proven absentee buyer services. This service has been successfully used for decades for many commercial cattlemen. We are happy to discuss the cattle prior to your arrival to save you a few steps too if that helps. So, call with anything, anytime, we're happy to help.

It's a "Family Tradition", see you there,

## WELCOME FROM BOHRSON MARKETING

High Bluff is a well known name throughout the cattle industry that is related to high quality cattle in both the Charolais and Simmental sectors. This hardworking, knowledgeable and driven family is passionate about the agriculture industry nationwide and producing the very best stock at home. We have a great respect for the people behind this program as they will surely put their customers first and stand behind their product with integrity and ensure you are a happy customer.

The Jackson family has decades of breeding excellence in Inglis, MB and is well known for raising great females that flat out produce. This productive cowherd has emphasized and preached foot quality for a long time and rightfully so as it is so important in the industry and they have generations of strength in that department. They are built on good udders and soundness while raising profitable calves annually and in turn, are the genetics that will make their valued customers serious ROI when they invest in these genetics. When you lay your eyes on this set of sale bulls; the hair, muscle, balance, dimension and overall consistency is to be commended. The set of replacement females on offer are selected off the top of their keeper pen to showcase the strength of their maternal genetics and offer their best to the industry but also to display the type of sought after females that you will receive when investing in High Bluff herd bulls.

They have assembled a strong set once again and to navigate the strength in two different breeds like this is impressive. It truly is a family effort there and their approach of raising top genetics has generated a lot of excitement in this year's set of sale cattle. We do encourage you to reach out to the High Bluff crew to visit more on the offering or any of the sales staff to represent your needs in a professional manner. We look forward to visiting with you more in Inglis, MB which will have great hospitality and equally as good cattle from a leading family in the industry.

Landslide boasts a lineage of champions, backed by quality and performance. His sire Innovation, surpassed all expectations with his first calf crop; he improves calving ease, passes on his remarkable phenotype and creates offspring with unmatched performance. When a 3 year old cow weans off a bull calf at 1208lbs one can't help but be excited about her and the calf's future. Whether you're aiming for championship titles or maximizing profitability and maximizing the growth of your market cattle, take a close look here. Landslide is no stranger to the show ring. He garnered attention making the finals at the Player Club \$50,000 jackpot at Ag-EX, where his paternal brother was slapped champion. He was breed Champion of the Presidents Classic and Senior Bull Calf Champion at Agribition.

When it comes to weaning and yearling weights, Leader of Men easily comes to the top of the pen. His power, performance and growth are undeniable. He really exemplifies what we are trying to do in the Charolais breed; power, performance, growth, hair and disposition. He follows the Ballyhoo stamp with a softer, more rounded muscle shape, a great disposition and extra length of spine. His dam is a powerful Escobar female.

Law Maker is in all of our top bull picks and it's easy to see why. His exceptional confirmation, muscle expression, depth and shape of quarter are admirable. He is a good mix of calving ease and performance. Behind every great bull is an equally impressive dam. Law Maker is a great bull that is backed by a great cow family. His dam is a beautiful Esperenza/Symbol female that we really appreciate for her power, femininity and attractiveness. Last year she raised a sale feature heifer that sold to Beechinor Bros Charolais. A front pasture cow with a bright future for sure.

This bull commands attention and respect. It's hard to find a fault in him. His style, presence, and herd bull look is undeniable. He is nice headed and has a good disposition and is easy to work with. Take a look at his birth date and actual numbers - for a late February calf he sure has a lot of performance. Lukenbach is out of a female that is paving her own path, Dandy 960G. Her first two sons were retained and now herd bulls within the Johnson Charolais program; as well her maternal brother HRJ Holy Water 55H was the National Champion Bull in 2021. She's a beautiful, big tanky, hairy cow with a nice udder. Top end herdsire prospect here!

Lieutenant is a bull that you aren't going to miss if you tour the bull pen. A bull you really have to admire him for that herdsire look, overall dimension and body mass. He has a nice masculine skull, is attractive in design and solid in confirmation. His dam is a beautiful, feminine, near perfect uddered Triumph female with a great track record. She has become a no miss cow that raises a calf that comes to the top of the pen every year. We're excited about her Keystone bull for the 2025 bull sale already. **HOMO POLLED. PARENT VERIFIED**

“Lucky” got his name the day he was born, and we’re sure glad things turned out well! He’s a bull that has always looked on point. He combines added length, big topped, square stout hip, overall body mass and is attractive in his makeup. Lucky is so well designed out through his front third topped off with a great skull. He has a big solid foot under him. His dam is a powerful female that has calved every year first cycle and has had a female for the replacement pen or a bull for the sale every year for the last 6 years. Lucky’s full sister comes to the top of the 2yr olds and a stout made full brother is on the ground this year. His maternal sister High Bluff Ladyslipper 72F is the dam to lot 10. Expect performance and consistency with these genetics! **PARENT VERIFIED**

A more moderate sized bull that is smooth made, nice headed, clean fronted that has a ton of hair and natural muscling. He’s backed by a hairy, good looking, beautiful uddered Escobar dam and her dam 150Z was a beautiful, big middled, hairy, Esperanza female. Hair should be locked into this pedigree! The SuelLEN cow family has been a very consistent producing cow family for us that has been around for a long time and can be traced back many generations.

**LOT 14**

We get pretty excited when a March calf looks and performs this well. In our pen he ranked 3rd at weaning and 7th at yearling weight time. Lucky Star is an attractive bull that is easy to find in the pen. He's a nicely made bull who is smooth but well muscled and soft sided, clean fronted with a good looking skull who is SUPER hairy. He's from the Natassia cow family that needs no introduction around her. This cow family is known for producing high quality cattle with a little extra punch. His dam's full sibling was the high seller at our bull sale 2 years ago to Heinz and Sons. Lucky Star has a beautiful Monsoon maternal sister that we are really excited about.

One of the most attractive and uniquely designed bulls in the pen. 3142L has a head turning look and presence about him that is hard to miss. His skeletal design and structure from the ground up is what really sets this bull apart from many; don't let his age interfere with analyzing this bull, the quality in him is very deep. Heavy haired, stout hipped and robust in his forerib and center of body. A bull that we thought long and hard about retaining in our herd. **HOMO POLLED.**

SIRE OF LOTS 33 & 34  
SCR TRIUMPH 2135

Some things don't get old around here, we really appreciate a good Triumph bull. The hair, the muscle shape, the length, the structure, the disposition, it just works. Our Triumph daughters in our herd are a testament of the Triumph legacy. Good looking, powerful females that have a strong production record and good longevity. Lock and Load did what we have come to expect from our Triumph bulls, he weaned in heavy at 1110 lbs, he had a yearling weight of 1500 lbs and he looked good doing it. **HOMO POLLED.**

This is the seventh registered calf off of this Stone Angel dam, and she raises them right for the commercial and purebred producer alike! A full brother to this calf collected an Agribition banner and was just such an impressive individual we wanted to try this pairing again. HD cows raise herd bulls that have the right look to them, lots of masculinity and hair and natural muscling. The HD x Triumph cross has been well received by our commercial cattlemen.

SIRE SCCG TRIED AND TRUE 8507

A Tried and True son that is exactly just that when it comes to proven pedigrees; tried, true and proven. The Game On females in the herd might be limited in quantity but the quality they bring to the table is limitless. Lincoln is the type of sire that will add the extras to his offspring; extra length of spine and that little extra frame that some cows may be needing to create those market topping steers.

Outcross red factors genetics that get back to basics and get the fundamentals right. With Louis it starts in the most crucial place at the ground and works its way up from there. He sets down square on all four with a big hoof, great bone and a fluidity in his movement that is admirable. When it comes to colored bulls it is hard to find one with the look; that is bold in dimension and maintains a softness throughout. Louis has the gains that the feeders of the world can only dream about; he has the highest weight per day of age at 4.7lbs! A bull we rate very high and feel has a bright future ahead of him.

Here's the heifer that first catches your eye when you walk in the pen with her stylish front end. But then get behind her and you'll see that she backs that style up with punch through the back quarter. Her Grandam is Rolling D Laura 941W who has the production record you dream of all your females having, and something we really look for when bull and female shopping. She weaned and registered 11 calves in a row and calved to the 1st cycle at 13 years of age. Last year she was awarded the Charolais dam of distinction award. Her dam, 27E is a beautiful, moderate Casanova female with a very nice udder and a good disposition. We are very happy with our Casanova females in our herd and in our opinion she comes to the top of the Casanova females quite easily.

Look at the balance and style of this Three Thieves heifer. Her dam is a beautifully uddered, big bodied female from the Carla cow family that has consistently produced top notch progeny for our bull and female sale. Her first bull calf was part of our Agribition show string who went on to work at Bar M7 farms. High Bluff Luke 21L is an impressive bull selling in this year's sale and is also from the Carla cow family.

We're starting the Simmental portion of the catalog off with one of our favourites. Luxor is in all our top bull picks and it's easy to see why. His herdsire look, exceptional confirmation, muscle expression, depth and shape of quarter are admirable. He really exemplifies what we are trying to do when breeding cattle; combine style, good structure, power, performance, growth, hair and disposition.

His dam is a family favourite - Ms. Splash is a friendly and gentle cow that is always up for a scratch. She goes back to the Lashes/Muchmore cow family who are some of our most beautiful and consistent producing females. This cow family has exceptional longevity, structure, fertility and moderates birthweight. Her bull in the 2023 bull sale was one of our high sellers to Niwa Ranching.

**LOTS 59 • 60 • 61**

Take a look at lots 59, 60 and 61. Three bulls that are genetically full siblings. We have flushed and bred the grand dam of these three bulls, Lashes 77B, a number of different ways and it has always worked. Her Lieutenant daughters, the dams of these three bulls, are beautiful, near identical females that are moderate, feminine, big capacity females with gorgeous udders. We think these three bulls are a testament to exactly why we wanted to combine Driller with the Lieutenant x 77B genetics, they are cattle that everyone can love. They are easy keeping, easy to look at and consistent, consistent, consistent. You're going to love the group of calves these boys will sire. The calves will wean in impressively off these boys but also take another look here if you're looking to build your replacement female pen, we can't say enough good about the females we know you'll get off of these bulls.

**LOT 61**

**DAM RED LASHES 122H**

LOT 62

When you walk in the pen this Driller bull calf will be one of the first ones you find. He's dark dark red and stout as they come. A pen favorite here for the natural mass, masculinity and style he has. Yearling weigh day he was in the top 5 heaviest bulls - 4 of which were separated by 5 pounds. He weaned in at 1100 lbs and was 1570 on yearling weigh day putting him in the top 1-2% for yearling weight and weaning weight respectively. 91G, who is a Red Summit, raised a nicely patterned, dark red bull calf for our 2022 sale. We are excited to see how this beautiful young dam keeps on cranking them out! As for all the Driller bulls, he always leaves his mark of docility and excellently structured animals and that is certainly displayed in Legend Builder, he has a nice big foot under him. This is an impressive bull, take a good look here.

LOT 63

Lancaster is the Driller x Red Lashes combo and if you've been through our catalog before we could probably stop writing this description now because you know the predictability, longevity, easy doing and docility of the combination of these two pedigrees. This is a dark red, nicely patterned herdsire prospect that we like a lot. The group of Driller bulls on offer are so similar, such a strong consistent herdsire group. We were really hoping that half of the 2023 Driller calves would be females, but that wasn't the case. Whether you are searching for your next herdsire to sire bulls, market cattle or replacement females Lancaster will be a good fit.

The Driller x Lashes combo shines through in this very solid fella. Last Ride is an impressive calf, with lots of quarter, a great head and a strong top. We sure are disappointed that this is Driller's last natural calf crop. The big dog finally lost a fight. We'll sure miss watching him walk in the pasture - he was just so fluid in his movement. Driller is the quietest bull we have ever had, a gentle personality who was always up for a scratch. Last ride dam is a maternal sib to lot 63. His dam had an impressive Epic bull calf in last year's sale that sold to M and J Farms. 2 good bulls in 2 years - she's off to a great start!

Lefty is a bull you are sure to find in the pen. And you'll probably ask is he really out of a first calver? You really have to appreciate him for his presence, mass, softness and haircoat. Lefty is a bull that displayed great herd bull character and masculinity from a young age. He's always been a favourite around here, and every time we see him in the pen we like him a bit more. When you start looking at his numbers and what a first calf heifer did you like him even more. On both weaning and yearling weigh days he was the heaviest bull in the pen - out of the Simmis and Chars! Lefty weaned in at 1160 giving him an ADJWT of 998 and a yearling weight of 1575 giving him an ADJYW of 1619. He's in the top 20% for CE, BW, WW and YWT.

Lefty is out of our favorite Playmaker x 77B daughter. A dark red, big bodied, hairy female with a great disposition. She's been a favourite of ours around since birth and has secured her spot with her production record. She's part of the Lashes cow family that needs no introduction around here. This cow family is known for their longevity, exceptional structure and producing top end progeny. Check out the other bulls her maternal sisters raised on this page. **PARENT VERIFIED. NON-DILUTER. High Bluff Legend 58L is an outstanding bull with exceptional lineage that we are sure proud to have raised. Legend is sired by Mader Walk the Line and hails from our esteemed Wanda cow family. His dam, 11G, is a big, beautiful female with an extremely quiet disposition who calved again first cycle with another WTL bull we are excited about already. In our minds the Driller x Wanda x Walk the Line x Darlin genetics really clicked. The origins of the Wanda family date back to the Friday Night Lights sale, where the original Wanda was acquired from Harvie Ranching for her incredible foot structure—a trait consistently passed down through subsequent generations.

Standing squarely on his impressive foot, Legend exudes softness, masculinity, muscle and possesses the right style. He has a moderate birth weight but punched his way into the top 1% of the breed for both weaning and yearling weight. When we got home from Agribition we toured around the bull pen and said we really should have shown simi's this year. We are really very proud of our simmental bull pen this year and we feel Legend comes to the top of our bull pen, albeit with some tough competition! With a highly sought after blend of genetics, structure, and aesthetics you won't want to miss the opportunity on this one. **HOMO POLLED. NON DILUTER. PARENT VERIFIED.**

Lone Ranger is a heavy haired, striking dark red bull with a great hip whose dam is 83A the original Wanda cow. For a glimpse into the remarkable breeding successes of this cow family, look no further than lots 72 & 88, who one could argue hold the top spots in both the bull and female pens. Wanda seems to have clicked well with some full blood genetics. Lone Ranger's sire, Magnum, is a full blood bull with 160 registered progeny. Wanda has a full blood female in the first calver pen that we like a lot.

**LOT 78**

Over here we are suckers for a herdsire with a cool look, a bull with some character and masculinity. It's something when we are bull shopping we always look for. This Son of Anarchy definitely has an attention grabbing look to him. His front quarter character makes him a true attention grabber in the pen. He's a moderate, smooth made bull that we think would be a good fit in a lot of programs.

We really love the look of our Son of Anarchy cattle, they've got that extra bit of "look on over here" style and oomf! Lawless has a great look to him with a bit of extra stretch and grow. His dam is stamping them right and consistently doing so with a very similar son having gone through last year's sale that sold to Hill Top Cattle and a female the year before that was our lead off Simmental that sold to Neil and Denise Carson. Lawless has a ¾ blazed face sister in the replacement pen that has been a favourite of everyone that tours through. We're getting pretty good at saying "No she's not for sale." If you want to see what we really mean, by a little extra look and style make sure to check out our Anarchy offspring.

Some things that we really appreciate about the Epic cattle is their docility, hair, calving ease paired with a ton of growth. This is our 5th year of successfully using Epic as a heifer bull. They are born the right size and a heifer can raise a calf that competes with what a cow can raise. It never gets old watching an Epic baby up and running around the pen and nursing a few minutes after birth. These are traits that we can all appreciate when raising cattle. His dam is a quiet, nice looking Playmaker x Red Lashes 77B daughter.

Here's a nicely patterned solid red bull from the Red Lashes cow family. We really like using the Bonchuk bull on our second calvers, he moderates birth weights, has nice colouring and leaves behind great females, there's a reason the R Plus 5015C (the Bonchuk bull's sire) females were standouts in their dispersal! He's a well made, hairy bull with a quiet disposition out of a beautiful Driller female that goes back to our Lashes cow family.

A sleek black heifer with a distinctive blaze face, and check out her pedigree with the iconic 600U, the female producing legend, on her maternal side. This fancy lady catches the eye with her style and while she may not hold the title of the pen's biggest performance heifer she's a standout in her own right. Her dam is just getting going as a young female in our herd but her grandam has an impressive track record, she always leaves her calves with a money stripe and 6 of her last 7 calves have gone through the bull sale and the other being the dam of this fine lady. Lots of maternal strength deep in the roots of this heifer.

# PAXHILL FARMS BLACK ANGUS

Tyler Digby  
Dropmore, MB  
(250) 681-3270  
paxhillfarms@gmail.com

It certainly has been a year to put a smile on the face of cattle producers this year with record high prices this fall and one of the most pleasant winters that I can recall.....I think I can say with a high degree of confidence speaking on behalf of the industry that we deserve it! But as any beef producer knows, there's always work to be done, the North American beef herd has shrunk considerably over the past several years and needs to be rebuilt to keep that top quality Canadian beef on the menu. Maternal traits are always a good investment for the cow-calf producer, but in an environment of higher heifer retention rates they become even more important. The selection of these six bulls from my yearling pen has kept this mind, ensuring every one of these bulls is out of cows with good udders, good feet, and docile temperaments with good mothering instincts.

The bulls represented include one of my favourite maternal producing AI sires, Bubs Southern Charm AA31. The many daughters of his retained in our herd have that picture perfect Angus udder, are deep sided with a nicely balanced disposition. The Bar-H Mindbender 141D sons are a sample of the coupons from a group of 10 bred cows/heifers purchased from the Red Rose Angus dispersal sale in December 2022. When I picked up the Mindbender semen that I purchased from that sale, Brian McCarthy was proud to tell me that in his opinion Mindbender would improve on all traits. That certainly has been our experience when viewing his very stylish daughters that have great udders, feet, temperaments and overall structure.

Ellingson Turn Key 0170 is a son of the very popular powerhouse Ellingson Three Rivers 8062. In our search for a good power bull we looked at many Three Rivers calves but felt that he brought more frame size than we needed for our cow herd, instead we elected to use this son of his that is a little more moderate with some extra length. We couldn't be happier with the results, the calves we've seen off of him are very consistent, heavily muscled, mild mannered with unmistakable presence.

Ellingson Badlands 0285 is a curve bending calving ease specialist that I think is going to make a mark on the Canadian herd in the next few years. We have used him primarily on heifers with no issues and are really looking forward to how some of his daughters develop into cows in the next few years.

Please accept my invitation to come to our farm to view these bulls, their mothers, siblings, and half siblings. I'm proud of the herd that we have built here and am happy to show it you and discuss which of these bulls is the best fit for your program. We also have a large selection of red and black commercial Sim/Angus based females that will be available for sale by private treaty as replacement heifers this spring or as bred heifers in the fall.

Here is a long bodied, smooth made bull with a lot of presence that just catches your eye when you walk in the pen. As you walk behind him admire that wide top and square hips all firmly planted to the ground with a great set of wheels. Top that off with the nice quiet temperament that this bull came by honestly from both sides of his pedigree. This is our first year using Turn Key and we really admire that muscle definition, masculinity, and docility he brings. I would try this bull cautiously on a few larger framed heifers or second calves to start, his dam has always been a low birth weight, calving ease specialist, but Ellingson Turn Key really is a power bull and need to see which side of the pedigree this guy favours in that department. 274 day gestation

This is such a smooth made bull with extra thickness and a nice square hip, just the way a good bull should be built, making him a favourite of visitors from birth to the present. His sire, Mindbender, is a curve bender. In two years of calving to him, we haven't had a single calf reach 280 days gestation, which really brings the birthweight down and the calving ease up. In my opinion this is a great choice for a heifer pen with his 81 pound birthweight and top 15% calving ease and birthweight EPD's without giving up on performance, style, and maternal greatness. Please note this bull is potentially a red carrier, we will try to get that confirmed by DNA prior to sale date. 271 day gestation

JJ walks the pastures here and in AB at MJT Cattle. We retained an interest in JJ and we are sure glad we did. JJ is a nicely made bull who is smooth made but well muscled and soft sided. He has a tremendous amount of depth of body and natural thickness. He has that herd bull presence, lots of nuts and a ton of hair and a nice big foot under him. As an extra bonus he is about as good-natured as they come- a quality that he passes onto his calves. JJ is backed by some of our favourite dams 942D is an easy keeping, big ribbed female with a good disposition and udder. 176W was one of our nicest made, most consistent, top-producing cows in our herd. At 10 years of age she looked great, maintained her youthfulness and impeccable udder quality and had a great disposition. 176W was known to shorten gestations, which JJ himself often does. We successfully showed JJ at Agribition where he was Intermediate Bull Calf Champion as well as on the international stage as People's and Judges choice at the International Charolais show. **HOMO POLLED/CLEAN HEADED**

Deputy is a heifer bull that has been successfully used at Johnson Charolais for 4 seasons and High Bluff Stock Farm for 2 seasons. What I first noticed about the Deputy sire group was the consistency in their growth, hair and disposition and was impressed with the weaning and yearling weights of the sire group. First calf heifers that raise off-spring that can compete with what a mature female can raise is no small feat! Deputy consistently sires calves that are the right size and shape for heifers. **HOMO POLLED**

An Authority bull that goes back to the great flush cow KOP MS Bengie 6P. Authority is a deep bodied, heavy muscled beef bull with impressive performance that brings a total outcross pedigree for Canada. We are very happy with Driller as a breeding bull. He is well made, travels exceptionally well and has a super disposition. Driller's progeny also have great dispositions, are consistent, very eye appealing and structurally sound. Driller has an impressive set of EPD's. We have been very impressed with the Driller females. They have lots of volume, great udders and are a pleasure to work with. At 8 years of age Driller still moved effortlessly and looks every bit the part of a great breeding bull. This is Drillers last year of natural calves.

Playmaker is a dark red Simmental bull who has a nice combination of calving ease and performance, backed by a solid set of EPD's. He is in the top 2% for weaning and yearling weights. Playmaker calves are born dark red, easily and have great get up and go when born. We really like our Playmaker females in production. **HOMO POLLED**

After a few years of calving heifers to Epic he has proven himself to be a great fit in our heifer pen. The calves have consistently been born the right size and make. The Epic calves grow well and push the scales down hard at weaning time, having the offspring off of heifers easily competing with the cow offspring. Our Epic cattle are deep bodied, soft made, hairy, have a dark red coat, and the dispositions on them are really good. Epic has total outcross genetics, impressive phenotype, and a great set of EPD's. His CE, BW, WT and YT are all in the top 10%. The Epic females we have in production are good cows. **HOMO POLLED**

Mescalito is a bull we found at Cody Cattle Company in Kansas and bought with Harvie Ranching and Kay-R Charolais. Recently we sold the walking rights back to Cody Cattle Company. Mescalito is a bull that we really admire for his power, presence, style and big time volume and hip. A bull that has a great big foot under him and travels well. Mescalito has sired a group of bulls that have a lot of style, presence, muscle shape and mass, natural thickness who push the scales down hard at weaning. They are a consistent, uniform group. Mescalito females are super stylish, attractive, feminine and angular with a lot of natural capacity and performance. **HOMO POLLED**
